Release Notes for SimplerQMS Patch 3.1.4

Improvements

ID	Summary	Details
SQ-284	Prevent CR Controlled Items from being edited when CR awaits approval	When a Change Request connected to templates or quality documents enters the "Awaits Approval Signature(s)" state, rejecting the template or quality document is no longer possible. This ensures that a CR isn't released with pending objects.
SQ-368	New views for Parent and Child Projects and Archives	In Main Views > Projects two new views are available for better folder structures: <ul style="list-style-type: none"> Parent Project > Child Project > Archive Project > Parent Archive > Child Archive

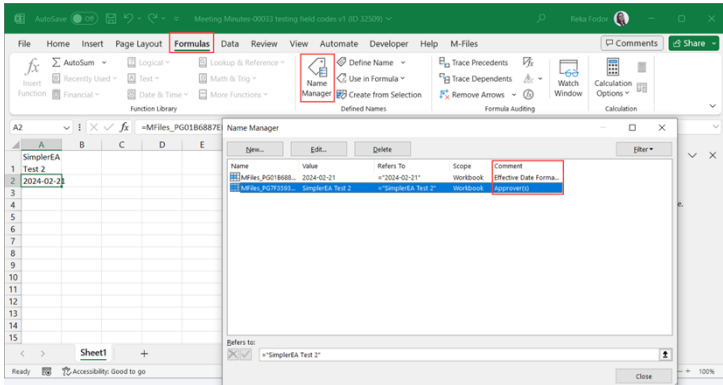

Bug Fixes

ID	Summary	Details
SQ-441	Action does not calculate Activation Date if Grace period unit is Weeks	The option for "weeks" has been removed due to the absence of a calculation rule in the configuration. For weeks, express as "7 (or more) Days" instead.
SQ-445	Prevention rule for Document Type change when routing for approval	Previously, under certain conditions, users could alter the Document Type while simultaneously routing a document for approval. This caused a discrepancy between the Document Type in the working copy and the released version. This issue has been resolved, preventing such inconsistencies from occurring.
SQ-637	Attachment overlay is only applied on page 1	Document attachment overlay is now applied to all pages. Any attachment where the issue can be observed can be routed for update and when sending for filing the overlay will be reapplied.

Department: R&D	Process: Deployment	Effective Date: 2024-02-20	Doc no.: 04490	Version: 1
Author(s): Reka Fodor		Reviewer(s): Jacob Sjørsløv	Approver(s): Jacob Sjørsløv; Reka Fodor	

SQ-645	Actions related to Change / CAPA cannot be created by user not in the Change Manager / CAPA Handler User Group	With the exception of users with "Read and Sign" permissions, any user can now initiate actions related to CAPA or Change Requests.
SQ-646	CAPA - close (final) review immediately has no electronic signature	Electronic signature requirement is fixed and this action will require a signature

Key improvements released by M-Files

Description	Standard Features
M-Files properties in Excel include the property name for easy identification	<p>M-Files properties now include the property name within the comment field of Excel Name Manager, making it easier to identify different properties in Excel documents.</p> 
"Input string was not in a correct format" error in the classic M-Files Web during object creation	<p>Creating a new object through metadata triggered the display of the error message "Input string was not in a correct format." in the M-Files Classic Web. The error has been resolved.</p>
